

Illia Herasymets

BACKEND-FOCUSED FULL-STACK DEVELOPER

+353 89 250 6942 | illia.herasymets@gmail.com | Clonmel, Ireland

SUMMARY

Backend-focused Full-Stack Developer with 4 years of commercial experience building production software, REST APIs, automation pipelines and AI-powered applications.

Started programming at 13 under the mentorship of a Senior Full-Stack Developer and have been building software ever since.

Enjoy solving backend problems, improving existing systems and building reliable software that supports real business needs.

WORK EXPERIENCE

Full-Stack Developer GOLDENSTAY

Dec 2024 — Present

- Developed customer-facing applications and internal management tools for a production property management platform connected to Airbnb, Booking.com and other channels through Rentals United.
- Built most of the customer-facing booking website and a secure Guest Portal with token-based authentication, reservation access and an AI assistant using property-specific context.
- Delivered backend features across property and reservation management by designing REST APIs, extending the Prisma/MySQL data model and implementing business logic, including Early Check-In and Late Check-Out workflows.
- Developed integrations between the PMS and external applications, including a custom WordPress plugin supporting property mapping, availability checks, price calculation and booking creation through protected APIs.
- Supported production releases, monitoring and troubleshooting using GitHub Actions, Linux, Nginx, TLS, Grafana and automated Telegram error notifications.

WORK EXPERIENCE (CONTINUED)

Python Developer | Part-Time
ESTET

May 2023 — October 2024

- Built a Python product-feed pipeline that imported supplier XML in multiple formats, normalized it into a common product structure and generated consolidated XML feeds for external sales platforms.
- Implemented configurable transformation rules for filtering unavailable or low-price products, applying price markups, modifying names and descriptions, normalizing stock values and generating supplier-specific product identifiers.
- Developed a Flask and Vue.js administration panel that allowed staff to manage output feeds, supplier URLs and per-feed or per-supplier transformation settings without changing code.
- Added real-time parsing progress and error reporting with Flask-SocketIO, and automated recurring feed regeneration to keep supplier product data synchronized.

Frontend Developer
REDBIRD CAFE

Nov 2023 — Dec 2023

- Maintained and improved the frontend of an AI-powered menu recommendation application built with Vue.js and GraphQL.
- Resolved production UI bugs, implemented new menu features and managed menu content and product images.
- Optimized frontend performance and improved the overall user experience.

Vue.js SCSS AI-powered menu

Backend Developer
CAC TOUR / CAC EDU

Oct 2023

- Maintained and improved Fastify-based backend services for travel platforms integrated with external tour operator APIs.
- Fixed frontend and backend issues related to tour search, hot deals and dynamic travel content.
- Implemented small improvements and bug fixes across REST APIs and customer-facing applications.

Fastify REST APIs External APIs

Full-Stack Developer | Part-Time
AMRITA

Mar 2023 — Jul 2023

- Rebuilt and maintained an e-commerce platform using Laravel, Vue.js and MySQL.
- Developed a flexible administration panel with hierarchical page management, allowing administrators to create and organize nested pages through a recursive structure.
- Implemented new business features and continuously improved the platform on a part-time basis.

Laravel Vue.js MySQL

Full-Stack Developer

2022

SAVE-HEALTH

- Developed new features for a healthcare platform used by posture specialists, working in a two-developer Laravel and Vue.js team.
- Built patient portal functionality, including secure image uploads and medical record management.
- Implemented an interactive image analysis tool that allowed specialists to place reference points on photos and automatically measure spinal angles to assist scoliosis assessment.
